## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1-3, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokogawa et al. (JP 10017435 A).**

Yokogawa teaches that extracts of *Mallotus japonicus* is used in an antioxidant composition for food, cosmetics and medicines. See abstract. The reference also teaches that the effective ingredient is compounded in 0.005-20 wt %, meeting instant claim 5. The composition is in the form of a cream, emulsion, lotion, etc. See instant claim 6.

The phrases “for inhibiting an activity of elastase”, “for promoting a collagen biosynthesis”, and “for improving skin wrinkles” in instant claims 1-3, respectively, are preambles which recite intended future use of the claimed composition. Thus no patentable weight is given to those phrases. See MPEP § 2111.02.

**Claims 1-4, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamabe (JP 09315986 A).**

Yamabe teaches a method of preparing antiinflammatory agent, comprising a solvent extract of *Mallotus japonicus* derived from *Mallotus japonicus* bark. See abstract. The composition is in the form of a lotion, cream, milky lotion or a pack. See

instant claim 6. Thus no patentable weight is given to those phrases. See MPEP § 2111.02.

The phrases "for inhibiting an activity of elastase", "for promoting a collagen biosynthesis", and "for improving skin wrinkles" in instant claims 1-3, respectively, are preambles which recite intended future use of the claimed composition.
